## Office of Equity, Access and College and Career Readiness

### Arranging for field trips not listed in this publication

Teachers may become aware of new places appropriate for classes to visit. Trips may be taken to facilities not listed in this guide, providing these steps are completed.

1. Discuss the trip with the school principal to determine the following:
  - Will the trip enrich pupil learnings more effectively than other available learning aides?
  - Is the trip closely related to the subject being studied?
  - Are the distance and traveling time reasonable?
  - Is the trip safe?
  - Is the firm or organization willing to have the class visit?
  - Is an appropriate source of funding available to cover all transportation and admission cost?
  - If using city bus transportation, are routes and bus stops reasonably close to the site to be visited?
2. Call the Office of the Assistant Superintendent, to ask for approval for the special trip. (This should be done by the school principal)
3. Call the Transportation Office (426-6176) or ext. 1515 and speak to a representative if planning to use the District buses or Long Beach Transit (591-8753) if using city buses.
4. Follow all district guidelines relating to preparing pupils for the trip, safety standards, parent permission, and follow-up experiences.
5. Complete the field trip evaluation form and send a copy to your Assistant Superintendent and EACCR. Describe briefly what was seen and done on the field trip, the major learnings, and any suggestions for improving the trip.
